

# Atlas-X1™

Industry-Leading Performance | Tool-Free Termination | Exceptional Versatility | Built for the Future  
UTP Cat 5e, 6, and 6A | Shielded Cat 5e, 6, 6A, and 8

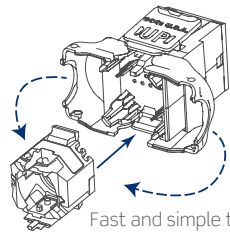

## Premium Copper System

Our premium category-rated system delivers the highest level of verified performance and reliability, offers tool-free termination for simplified installations, and is easily scalable for migrations up to 40GBASE-T. Atlas-X1 is ideal for deployment in all types of mission-critical networks and capable of supporting Power over Ethernet (PoE) up to 100 watts.

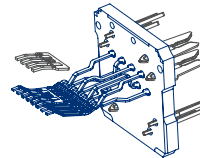

Matching-color icons included for easy identification (pack of 72 icons also sold separately)

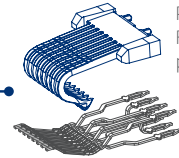

Fast and simple tool-free terminations and re-terminations

13 colors for simple tracking (UTP and Shielded)

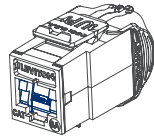

Patented triple-stage compensation provides industry-leading performance (Cat 6A only)

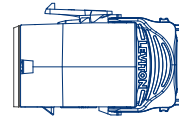

Patented Retention Force Technology (RFT) prevents tine damage

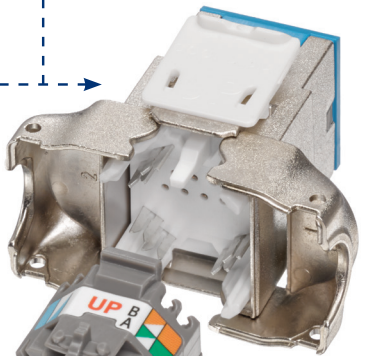

PoE optimized tine geometry prevents damage from arcing at contact mating zone between plug and connector

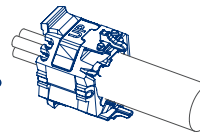

Connector available with internal shutter to protect against dust and debris

Solid metal body provides unparalleled durability in both UTP and shielded connectors and dissipates heat 53% better than plastic connectors for PoE applications

Short depth connector provides improved bend radius and density

Innovative wire manager with strain relief and door-release levers supports quick, repeatable terminations

360° grounding on shielded wire manager with integrated drain wire capture
